### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **SPPLEMENTAL DETAILED ACTION**

This office action is responsive to Applicant's preliminary amendment filed on 4/23/2004.

All the rejection made in previous Office action is hereby withdrawn.

Claims 19-24 are examined.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19-24 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hirano et al [US Pub No. 2001/0017967].

Hirano et al disclose an optical fiber having a ratio of a dispersion to a dispersion slope being positive [see abstract] at 1550  $\mu\text{m}$ , a positive dispersion of 18 to 23 ps/nm/km, a transmission loss of about 0.180 dB/km [column 2, [0016]], an effective core area of 110  $\mu\text{m}^2$ , and a bending loss of lot less than 20 dB/m [see fig. 11].

Hirano et al discloses every aspect of claimed invention except for the polarization mode dispersion of 0.15 ps/km<sup>1/2</sup> or less.

Art Unit: 2874

Hirano et al show all the claimed structural limitations, it is clear that the claimed polarization mode dispersion value is inherently shown by the Hirano et al's optical fiber.

### ***Conclusion***

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further references of interest are cited on Form PLO-892, which is attachment to this office action.
